

19 LUMINA LED (24-LED)

Construction:

The unit consist of a body (1). A shade (3) is mounted to the luminary body with a ring (2). A disk (5) separating electrical compartment from lighting compartment, is attached to a ring (2). A LED light sources radiator (6) is settled to the disk (5). LED modules (7) are mounted to the radiator (6) with a set of lenses, by screws. The modules are powered with a power supply (8). The luminary cover (4) is mounted to the luminary body (1) with a hinge and closed with a screw (10) so no additional tools are necessary. The luminary is sealed with a gasket (9) As an option, we equip the luminary with a ZHAGA socket (11).

Mounting instructions:

- *)- Mount the shade (3) to the body (1) with a ring (2). Tighten mounting bolts.
- *)- Screw the LED light sources(7) with a lenses to the radiator (6), mount a disk (5) to the body (1).
- *)- Connect the electrical cables according to the scheme.
- Close the cover (4), screw the bolt (10) using hand.
- Luminary is mounted to the lantern depending on the pole construction - either hanging on M20 thread or mounted on the top of the pole on $\varnothing 45\text{-}\varnothing 90$ diameter.

If any lantern elements are supplied factory-mounted, the mounting stages marked with *) should be omitted (as this has already been done by the manufacturer).
